### Individual tests

<b>SARS-CoV-2 by RNA (RT-PCR) Detection</b>	<b>Negative</b>			Negative	700	10-Dec-2022	10-Dec-2022	10-Dec-2022
---	-----------------	--	--	----------	-----	-------------	-------------	-------------

Multiplex real-time one-step RT-PCR system for detection of SARS-CoV-2, Influenza A virus, Influenza B virus, and Human respiratory syncytial virus in human specimens.

This has not been FDA cleared or approved. The performance characteristics of the Allplex™ SARS-CoV-2/FluA/FluB/RSV Assay has been determined by BioCollections Worldwide, Inc in compliance with the Code of Federal Regulation (42 CFR § 493.1253).

Positive results are indicative of the presence of SARS-CoV-2, FluA, FluB or RSV RNAs; clinical correlation with patient history and other diagnostic information is necessary to determine patient infection status.

Positive results do not rule out bacterial infection or co-infection with other viruses.

Negative results do not preclude SARS-CoV-2, FluA, FluB or RSV infection and should not be used as the sole basis for patient management decisions. Negative results must be combined with clinical observations, patient history, and epidemiological information.

### Performing Laboratory(ies):
